MINE AND PROSPECT; FURNACE AND MILL.

THE UTAH CON'S. WEALTH OF ORE

Reserves, Greatest in Annals of Mine, Now Estimated at No Less Than \$25,000,000.

With the present output of its valley furnaces to be materially increased with enlargements which are progressing to a completion in June, there is no reason why the Utah Con, of Bingham should not continue its record of dividends, said Manager R. H. Channing on his reappearance at the local offices of the company after several weeks in the East, yesterday morning, and while he positively declined to discuss any possible increase in the distribution, an increase in the earnings naturally begets such an expectation Not only this, there has never been a time when the stu-pendous tonnages in the property were so great as are they at this period, and while the management has declined to release its totals, it is no exaggeration to fix the value of reserves now literally blocked out at \$25,000,000. All this, how-ever, is data that Manager Channing has reserved for his report, which will be spread before the shareholders of the Utah Con. at their annual meeting in New York next month and that will be forwarded to every interest by President Urban H. Broughton as has been the practice since the inception of the splen-did undertaking. That the enlargement of the smelter, said Manager Channing, of the emeiter, said Manager Chambles, will positively be completed as scheduled, he has the assurance of every person engaged upon the work, and with the advent of June the volume of ore reduced will have been increased to at least 700 tons without increased cost, although the leaves of output will according to the leaves of output will accord to the leaves of output will be according to the leaves of output will be ac though the increased output will afford places for 150 more persons between the mines and smelter. It is after these enlargements shall have been achieved and the mines are permitted to accen-tuate their resources that Manager Channing is promised a visit from President Broughton and other officials. With others who have been East re-cently, Mr. Channing is very much pleased with the manner in which the

AWAY DOWN IN THE TINTIC'S LIMESTONES

stocks from this State have deported themselves during the unsettled period on the Boston stock exchange. Indeed,

Utah Con, has been a beliwether during

the tribulations of Amalgamated, while

Its neighbors have given good account of themselves. Mr. Channing leaves for

message from Superintendent Brown of the Centennial-Eureka yesterday morning advised the local management that the main shaft upon that Tintic bonanza had then reached a depth of 1050 feet, and as the horizon for which he had started when sinking was resumed at the 1575-foot station had been attained, work in the shaft was indefinitely suspended. While the bottom of the shaft below its collar is but 2050 feet, the formation has now been fatherned for 2750 feet, and with this death. omed for 2750 feet, and with this depth the student of Tintle limestones is re-lying on some most instructive discov-eries. Drifting toward the ore-bearing channels from lower levels will be pros-ecuted, however, only as convenience shall permit, said Mr. Allen, the general superintendent, during the day, present season. Without interruption whatever, the lowering of the main shaft has been going on at the property, from which the United States smelter is now receiving 250 tons of ore daily, an achievement that shows most systematic management.

A WEEK'S CROP OF ORE AND BULLION

In the ore and bullion market the week closed on settlements aggregating \$430,000, this compared with a total of \$477,400 for the previous week, the shrinkage due to an interruption in the transportation of ore via the Copper Belt, out of Bingham and along the avenue between the valley and Alia. However, this was overcome by the copper furnaces of the valley, from which, during the same period, there was forwarded 713,917 pounds of copper bullion with the cutput of that class of bullion from the furnaces of the Amer lcan swelling the crop to nearly 300,000 pounds, the record closing as follows:

 Bingham Con
 181,674

 Utah Con
 306,235

 United States
 256,336
 Grand total898,517

The day's settlements in the open market amounted to \$57,000, McCornick & Co. reporting them as they follow: American bullion, \$30,300; gold, silver, lead and copper ores, \$25,700.

In the metal market silver ruled at 57% cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at 11% cents a pound. 11% cents a pound.

The day's settlements in the open

MERCUR SLIMES PLANT.

The Machine a Success Mechanically -The Month's Run

The new slimes plant at the Con-Mercur is certainly a success mechanically, said President John Dern vesterday, and that the metallurgic results will be as satisfactory he has no doubt. The latter cannot be determined, how-ever, until the end of the month, when an intelligent log can be arrived at concerning the cyanide consumed and the gross cost of treatment. He has no doubt of the general result, how-

Will Use Three Machines.

A most important move contemplated the management of the Copper Belt rallway, says the Bingham Bulletin, is the employment of three engines as soon as they can be obtained—to include the one recently injured (in January) and now nearly repaired. With three engines at command the road will for | vantages every interest will have been

the first time be fully equipped for bus-iness, and accidents should be few and far between. To keep up with orders the engine just crippled has been over-

It is told on the quiet that a Clipper Hill property is drifting on 7 feet of ore, encountered a few days ago.

WEEKLY OUTPUT OF MINING EXCHANGE

While the week's trading on 'change was confined to 107,100 shares of stock, with the contents of the cash register reduced to \$29,005.50, the market was not entirely devoid of strength, with feeble assurances that better times are nearing the dawn. Of this Daly-Judge was an exponent, the shares, no matter what influences behind them, other reports say that Superintendent Mc-Sorley knows what he is headed for, moving up to \$4.50 in the trading, with but very little, apparently, to be dis-lodged at those figures. Daily West as a feature was not so pronounced, but "money is tight," on the authority of seventy plungers who are doing busiseventy plungers who are doing business in the pit, and however tempting the opportunity there are periods even in the career of the plunger when he is required to pause. Con Mercur, with its stalwart admiral again on deck and the slimes-plant adding to its profits closed the week on a bid of 60 cents, while old Ontario, of which it is said that it is "again making money." that it is "again making money," found a market at \$5, notwithstanding the contemptuousness with which it had been treated the previous week on the New York board. Nalidriver, of the same great camp, was not so defant and accommodated a regular customer or two around the close at 25 cents, while Century was held at 76. Mamment of which is Mammoth, the management of which is sparring for a market that will justify it in putting out 100 tons of ore daily, was marked up to \$1.40, with Grand Central evincing a willingness to let a small number go at \$3.47%, although it is said of the ore bodies that at no time have they represented a larger volume of ready money. Although from the furnaces of the United States company there is now gushing approx-imately a million pounds of bullion monthly, with the bonanzas showing an unprecedented volume of ore, closed an offering at \$21, with some interests

regretting, perhaps, their inability to get it for less, while Silver King, whose shareholders are drawing down \$8.66 2-3 shareholders are drawing down so.00 2-0 a share annually, was marked down to \$70. Daly closed to a bid of \$2, with but \$1.20 to be had for Montana-Tonopah, owing to doubts that have been aroused over future dividends, while aroused over future dividends, while Yankee Con. was to be had at 44 cents after selling around 48.

California this morning, where he will join Mrs. Channing, who is now sojourn-ing along the Pacific's shores. The day on 'change closed on the sale of \$505 shares for \$3854.38 and upon the following market:

NEW MACHINERY

FOR THE MONTANA

With the new engine upon the ground the boiler now at Sodaville awaiting the arrival of teams, the active sinking of the permanent shaft on the properties of the Montana-Tonopah Mining company at Tonopah, Nev., will have begun in short time, said Charles E. Knox, the general manager, on his arrival from camp yesterday morning.
The intention of the management is to
drop down with all possible dispatch to
a depth of 650 feet, on which level connections will be made with the deepest workings now attained, and with this outlet the production of ore will be upon a most energetic scale. Mean-while thirty tons of high-grade ore is being raised daily, the branch between the camp and the main line of railway is being constructed, and with these ad-

materially promoted. While there is a fine surplus in the treasury at this time there is nothing to add to what has al-ready been said upon the subject of dividends, the distribution of which will be resumed when the management deems it consistent. Manager Knox left for Philadelphia during the afternoon to confer with interests there.

DICK COLBURN MAKES A SALE

GOLDFIELD, Nev. March 5 - Dick Colburn, formerly of Salt Lake City, is right in the swim at Goldfield, and this week made another sale of some of his mining interests. Himself and associates have sold the G. A. H. claim to Mesers. Cleary and Harvey, acting for Patsy Clark and Maj. Kingsburg of Spokane. The G. A. H. claim joints the Vernal No. 1 on the west and is believed to have the extension of the ledge which is showing up so well in the latter. Clark and Kingsbury, through their agents, have now secured a large acreage in this vicinity, and the development so far done proves that it will become very valuable.

A strike of good propertions is reported from the lease of Sweeney, Hennessy and Wingfield on the Florence claim. It will be remembered that this lease got good ore a few inches below

lease got good ore a few inches below the surface, but as sinking on the ledge was slow and expensive, it was decided to sink through the porphyry on the footwall and crosscut. At the 50-foot point in the shaft a crosscut proved the ledge to be 8 feet wide and assays show the system while to be 5500 to the top. the average value to be \$300 to the ton. Fablus M. Clarke, a prominent attor-ncy of New York, and A. E. Barnes of Philadelphia have bought the interest of Mac Wilson in the lease on the Flor-ence, which adjoins that of Sweeney and associates. Good values have been found on this lease, but it has not been opened up much as yet. Messrs. Clarke and Barnes have also let a contract to sink 50 feet on their lease of the Pipe Lucam Fraction, which lies north of the January claim.

the January claim.

Harry Ramsey, one of the pioneers of the district and a heavy owner of properties here, has returned from a three months' visit to California, and is preparing for active work on many claims. Ramsey, Hall and Crook have put men to work on the Hat claim of the Blue to work on the Hat claim of the Blue Bull group, who have already opened up ore which pans gold freely. Some of it shows the prettiest wire gold that has been seen in the district. The owners have also given a lease on the Blue Buil claim to Myers, Murphy, Forman and Hall, who promise to open up ore with-in ten days. Myers and Murphy have a large number of valuable claims of their own and the fact that they have interested themselves in a lease on the Blue Bull shows that they have un-

confidence in the property. Briggs and associates have started work on their lease on the Adams laim. An average across 4 feet of the ledge on the surface showed values of \$15 to the ton, and the boys are satisfied they will strike pay ore.

they will strike pay ore.

Edgar Collins, manager of the Combination, and C. F. Maunder have bonded the Brooklyn group of four claims from Seller, Richardson, Kamer and Cockburn. .
S. K. Bradford has just come in from

the copper properties 21 miles south of Goldfield, where he has finished survey-ing the twenty claims in which himself and associates are interested. and associates are interested. The re-ports from this section would indicate that it is liable to prove one of the big copper propositions of the world. On one clam the croppings are the full width of the claim and apparently it is one ledge. The croppings can be traced for three claims in length and the assays go 11% to 32 per cent copper and \$4 to \$9.80 in gold per ton. Abundance of water can be had a short distance away, as well as a good supply of wood

ARE RECLAIMED

Unrelenting Efforts of Secretary Snyder Rowarded at the Eleventh Hour.

The unremitting endeavors of Judge W. I. Snyder in behalf of the California Mining company have been rewarded and interests that appeared to have been irreclaimably lost a few hours age are, through his tireless exertions at least temporarily restored to the crestfallen shareholders. It was a little after four o'clock yesterday afternoon that means with which to accomplish this were devised and, with \$12,166, he entered the offices of W. W. Armstrong, the latter representing the syndicate into whose hands the deed to the estate had twenty-four hours before been placed. As indulgent as had they been for some time this sum was received by the new owners of the mines and mill and a contract entered into in which the company recovers esession of its former holdings, a reconveyance to follow on the payment of \$15,000 six months hence. Not only had Judge Snyder recovered possession of the mines and mill but more. He had succeeded in trimming down the \$15,000 judgment rendered against the company last year for personal inju-ries sustained by a former employee to \$1005, and saved the company a sum equivalent, almost, to the balance re-quired to recover title to its holdings. With all this accomplished the manage-ment announced that those who had defaulted in the payment of the recent assessment will be allowed thirty days additional time in which to recover their holdings.

Among the shareholders there was much glee, while for Judge Sayder there were the most liberal expressions of greatitude.

With the property and plant back in their custody the directors of the company, said Judge Snyder last night, will be convened at once and its fu-ture decided on.

A NEW MOVE IN

THE FIELD OF IRON

That all-rail intercourse between the measureless deposits of Iron Mountain and the world without is now assured, Interest in its wealth of resources was never so acute, advices which arrived from the East during the day indicating the early organization of a com-pany that shall, with equipment, ac-compiled within the boundaries of Utab what the Colorado Fuel and Iron company has achieved in Colorado. While the source from which these adlees come does not go into details it pens a wide field for intelligent con-ecture. Indeed, those in possession of Interests in that region have been assured for some time that it was not proposed that the Colorado company should be permitted to monopolize its entire resources and that when the plans of its rival were completed they would provide for iron blasts within the State and not allowable remote from State and not altogether remote from the base of supplies. The information published exclusively by The Tribune a week ago is verified by the letter from the East and that railway con-struction between the Iron fields and a main line is positively known. It is denied that Senator Clark is at the denied that Senator Clark is at the head of the new undertaking, but as-surance is volunteered that the leader is a man of equal prominence and of much experience in enterprises originating with the world of iron. To some the wait has been a long and trying one, but none have ever believed other

In Grain Investments

Sound judgment counts for a great deal. The shrewd speculator is the who watches the market, not the lool who rushes in just for the sake of dabbling.

Saving from earnings is a slow way to accumulate wealth. Often times a single month of judicious trading will make a person independent for a lifetime. But speculation must be done with adgment and with a good reason for every move. To speculate successfully the temper of the market should be watched and the condition of the crops studied. There is no necessity of becoming over-stocked or loaded down with shop-worn goods, as in business. You can quit at a moment's notice. That is where graintrading differs from dealing in ordinary commodities.

Grain has always an instantly ascertainable value dependent altogether on supply and demand. The grain market fixes the price and you always know what that value is. We have had years of experience dealing in grain. In fact, we are the oldest house of its kind in St. Louis, or west of Chicago; established 1892. We are in direct communication with the world's great markets by

direct private wires. We publish a booklet on specuinvestments and a booklet of valuable statistics. Both free on request.

DONOVAN COMMISSION CO.

317 Pine Street, ST. LOUIS, MO. than that their hopes would be ultimately realized.

LOCOMOTIVES FOR TONOPAH ROUTE

Charles A. Miller, general manager of the Tonopah Mining company's Nevada properties, who is now on his way to camp, says that just as soon as the iron on the branch between Tonopah and Rhodes has reached a terminus twenty-five miles out of the latter sta-tion the Tonopah company will begin the active forwarding of ores to meet it, the active forwarding of ores to meet it, and continue that policy as each receiving station in established. To hasten the operation of the line the management has two new locomotives now on the way from the Baldwin works in Pennsylvania, while ore cars and passenger coaches are now in transit. Manager Miller will return to Philadelphia by ware the phia by way of the southern route.

BIG MEN AT ITS HEAD.

Monarch Company Officials Among the Most Prominent.

A letter from New York to a prominent banking man of this city emphasizes the fact that the launching of the Monarch company by equally prominent financiers in the East has been accomplished, and that with these gentlemen plished, and that with these gentlemen at the helm the undertaking will have soon attained the position to which its estates in Beaver county and other regions entitle it. In the exploitation of the big project by those who have identified themselves with it there will, it is said, be no delays, and with a capable management at the properties results should soon be achieved. As officials and directors the new company will be surrounded by those who have attained most eminent places in the world of most eminent places in the world of commerce and of banking, and the per-manent organization cannot but inspire the confidence of every interest at home as well as abroad where those sonstituting it are personally known. It is un-dersteed that the president of the com-pany will be one of the most active of New York's banking men.

COL. TRUMBO DEPARTS.

Failed to Land Bonanza for Which He Came to Town.

Unable to accomplish the mining deal upon which he returned to Utah a few weeks ago, Col. Isaac Trumbo will leave for California again this morning, to give his attention to the gold mines and mills that are being operated by him in that State. It was said during the day that the Colonel had induced Newt Dun-gan, a late manager of the Dely-Judge at Park City, to accept a position on his properties in California, but this was denied. It was also said that during his sojourn in the city Col. Trumbo had made a tender of \$4.50 a share for the Farnsworth holdings in the Bullion-Beck, but this was rejected and the undertaking was indefinitely hung up. However, the Colonel promises to re-turn at a later day, when local inter-ests may be prepared to offer him something in the diggings that shall meet his requirements.

TO VISIT HONERINE.

OFFICE OF CHIEF QUARTERMAS-OFFICE OF CHIEF QUARTERMAS-ter, Denver, Colo. March 4, 1994.—Sealed proposals in triplicate will be received here until 11 a. m., April 4, 1994, for trans-portation of military supplies, Routes Nos. 1, 2, 3, 4, 5, 6 and 7, and for drayage at Denver, Colo., during the fiscal year com-mencing July 1, 1994 U. S. reserves right to accept or reject any or all proposals. Information furnished on application, En-velopes containing proposals should be marked; "Proposals for Transportation on Route No.—," addressed J. W. Pope, Chief Q. M.

It does seem that women have more than a fair share of the aches and pains that affect humanity; they must "keep up," must attend to daily duties in spite of constant aching back, of headaches, dizzy spells, bearing down pains, they must stoop over, when to stoop means torture. They must walk and bend and work with racking pains and many aches from kidney ills.

Kidneys cause more suffering than any other organ of the body. Keep the kidneys well and health is easily maintained. Read of a remedy for kidneys only, that helps and cures the kidneys, and is endorsed by people you know.

It does seem that women has the aches and pains that affect hum must attend to daily duties in spot headaches, dizzy spells, bearing over, when to stoop means torture and work with racking pains and Kidneys cause more suffering body. Keep the kidneys well and Read of a remedy for kidneys on kidneys, and is endorsed by peop with the kidneys and kidney complaint, attacks of which I have had for years. I had a sister who died of liver trouble, and many a time I have been overanxlous about my own condition for the persistent aching just across the loins, which radiated towards the shoulders which hurt when I stooped and straightened after stooping or lifted anything, often kept me in misery. When there was added to it bachache, trouble with the kidney secretion and dimness of vision I knew my kidneys required attention. I had used a great many remedies for kidney complaint and liver trouble, some of which may have had a slight effect, but from none did I obtain half the satisfactory results as from Doen's Kidney Pills, procured at the F. J. Hill Drug Co.'s store. This remedy acts directly upon the kidneys You can tell that from the behavior of the kidneys secretions. They are first affected and when they become normal the aching across the loins ceases. In hopes that my textimonial may induce others to use Doan's Kidney Pills who have kidney trouble I unhesitatingly allow it to be published."
